

Axxya Licenses Rights to Develop, Support, and Market Nutritionist Pro™, Nutritionist Pro Food Labeling™, and Nutrition Knowledge Base™ Products

Dear Nutritionist Pro Customer or Prospect,

I am pleased to announce that First DataBank's nutrition product line will continue to be supported and developed by Axxya Systems, a developer of nutrition and fitness products.

For over a decade, First DataBank has been proud of our nutrition product line and its history of serving dietitians and their clients. Nutritionist Pro™ has been a leader among many competitors, and its brand is highly respected. Late last year, however, First DataBank regrettably announced it would no longer be able to support the ongoing development of our nutrition product line as we must fully dedicate our resources to pursuing development initiatives that foster growth in our core businesses.

In licensing the nutrition products, Axxya will continue developing, maintaining, distributing, and supporting Nutritionist Pro™ nutrition analysis software, Nutritionist Pro Food Labeling™, and the Nutrition Knowledge Base™ products.

For more information about Axxya Systems and their plans for the nutrition product line, please refer to their website www.axxya.com or call 800-709-2799.

Sincerely,
William Wright
President and CEO
